Oscillatory mean-field dynamos with spherically symmetric, isotropic α

Frank Stefani F.Stefani@fz-rossendorf.de Gunter Gerbeth G.Gerbeth@fz-rossendorf.de Forschungszentrum Rossendorf, P.O. Box 510119, D-01314 Dresden, Germany

abstract Until recently, the existence of oscillatory mean-field dynamos of the α^2 -type with spherically symmetric and isotropic α was an open question. We find such dynamos by means of an evolutionary strategy, and we illustrate the spectral properties of the corresponding dynamo operators.
